

NEW Windows & Doors™

Replacing Tilt Pins on a Slider Window

Replacing a tilt pin on a slider window is a simple operation that should take approximately 15 minutes and is rated as an EASY repair. This procedure is performed entirely within the home.

Approximate Time Required:

15 Minutes

Level of Difficulty:

Easy Moderate Difficult

Tools Needed:

#3 Robertson Screwdriver

Step 1

Slide the sash to the open position and undo the screws on the tilt pin. Gently push the sash away from the pin.

Step 2

Pull the pin out of the shoe and replace with the new pin. Slide the sash against the new pin and install the screws.
